

FOR IMMEDIATE RELEASE...

Sock Company ‘Weaves’ an Untangled ‘Web’ Especially in the Healthcare Industry

New York, New York – [May 1, 2010] – New Hampton Creations, Inc. creates hosiery products, socks, and sheers catered to a clients’ specific customer; however, New Hampton Creations, Inc., also specializes in healthcare related hosiery products for clients and their customers that might have diabetes for example. A Website makes buying these types of products easy and convenient for clients that cater to these customers. Now it’s available live and in color!

In the hosiery business since 1939 this family owned and operated business deals with traditional brick and mortar retailers, mail order customers, queen size catalog houses and the US Government. However, this particular company specializes in healthcare related hosiery products, and with so many in need of specialized hosiery products it is a blessing that one can now find them right on the Web. Prices are excellent, and what is ultra special is that if you need something specific, it can, and will be made according to ones own specifications.

“We develop, design and create the appropriate product for you to sell and to increase your own sales.” David Hoffman said. “If you need it, and you want it, we will make it!” David Hoffman, Vice President, sales. <http://www.nyshose.com>. New Hampton Creations, Inc. also makes high quality socks that are made in the USA as well.

More information about New Hampton Creations, Inc. can now be found on their new site at <http://www.nyshose.com>.
